

Address & ID

Patient Address and Identity Verification

Address & ID from DCS searches for a patient's current and previous addresses. The patient access team only needs to enter the name and last known address, or telephone number; Address & ID does the rest.

Providers receive a huge amount of mail alerts due to incorrect addresses. This becomes a hassle, as they have to assign dedicated staff members who search through a variety of directories to try to find the correct address. Address & ID simplifies the process at registration to help identify proper billing addresses.

This fraud deterrent tool provides greatly enhanced security. It compares the billing address provided by a patient to the address on file with credit bureaus. Address & ID is fully integrated with AuditLogix™ and has the capability to view the erroneous accounts in easy to read work lists.

Address & ID verifies addresses for every patient account during Pre-Registration or at the time of Registration.

Why Use Address & ID?

- Fully integrated with AuditLogix™
- Red flag compliances
- CASS certified addresses
- USPS delivery point validated (DPV) addresses
- Helps to detect fraudulent address
- Increases staff productivity by eliminating countless hours verifying correct address
- Improves cash flow
- Compatible for real-time or batch verifications
- View error accounts via work list
- Build rules/edits to alert the admissions staff with possible fraud

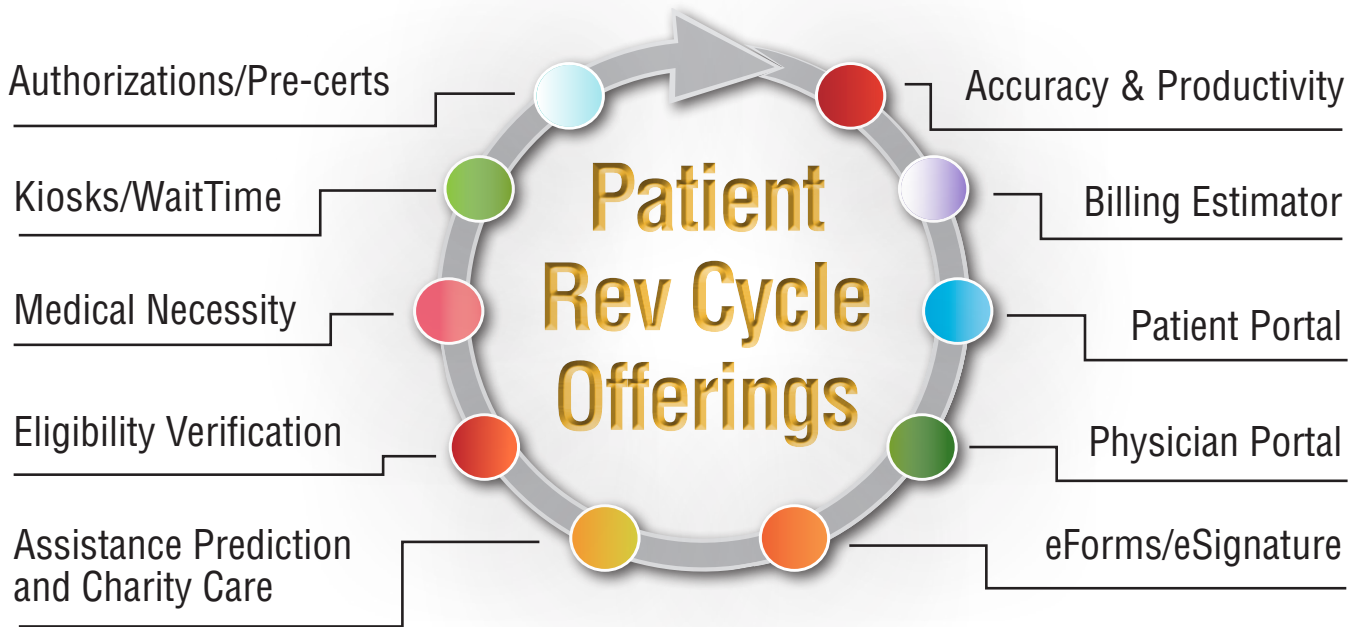

The Patient Access Company
