

AuditLogix™

A Front-End Tool For Auditing And Correcting The Entire Registration Process

AuditLogix™ from DCS is designed to create accurate and timely claim submissions and billing through identifying and removing errors in the registration process. It catches and corrects mistakes before they impact your cash flow and other revenue cycle processes. Accurate and organized patient registration information results in fewer denials, rejected claims, returned statements and other delays that impede collections.

AuditLogix™ detects problems inherent in your existing business processes and systems and helps you determine how to correct the problems. In addition, the system has the ability to perform insurance eligibility on all accounts to better assist the registration staff and automate the process.

Why Use AuditLogix™?

- Fully integrated with HIS
- Integrated Insurance Eligibility
- Integrated Patient Identity
- Increases staff productivity & efficiency
- Improves cash flow
- View error accounts via work list or popup
- Build your own rules/edits to alert the admissions staff with possible errors
- Integrated with Kiosks
- Capture payments at POS by accepting Credit Cards/ Debit Cards
