

Patient Bill Estimator™

Know your bill ahead of time

Patient Bill Estimator™ is integrated with major ADT systems using HL7 technology. The estimates are calculated looking at prior claim history as well as provider contracts with payers. In 3 easy steps it provides the calculation and patient estimate in real time. Optionally, the system provides score cards on patient collection performances for each registration staff. It can also allow you to charge credit cards and make Financial Arrangements (Minimum deposit, due now, amount collected).

Patient Bill Estimator™ helps to generate a statement with an accurate calculation of patient financial responsibility, including patient eligibility, contract terms, YTD deductibles, co-pays, co-insurance, and out-of-pocket status and limits. It significantly improves the POS cash collections by providing detailed data regarding patient liability before the service is rendered. The processed data is used to provide actionable reports for upper management. It also provides the ability to generate a patient estimated out-of-pocket expense acknowledgement letter for patient signature.

Patient Bill Estimator™ helps to generate a quick patient estimate before the service is rendered.

Why Use Patient Estimator™?

- Gives instant overview of each patient's benefits and coverage
- Generates accurate Patient Estimates
- Fully integrated with HIS
- Real-time Eligibility access to over 400+ payers
- Integrated with AuditLogix™, Registration QA Tool
- Integrated with RegKiosk, Patient Self-Service Kiosk
- Helps to identify and manage self-pay accounts for in-time self counseling
- Improves cash flow
- Enhanced Reporting from the data received from the payers
