

# Patient Portal™ & Self Registration

Online Bill Pay, Self Registration and More

PatientPortal™ from DCS is a web application that allows patients to self-register from anywhere, anytime. Patients can manage and securely pay their bills online, as well as create, maintain and update their profile information. The web based application also provides the ability to request appointments online by providing the appointment date/time and appointment type. This helps with cleaner data and less denied claims. It minimizes the patient wait time as forms are pre-filled with pertinent information.

PatientPortal™ improves patient satisfaction and results in increases of collections and lower A/R days. The system can be set up to send reminder emails to patients before their scheduled appointments. Integration with patient check-in kiosks provides the patient with virtually zero wait time in the patient lobby. After discharge, patients can pay their bills online via credit cards, debits cards or ACH.

## Why Use Patient Portal™ & Self Registration?

- Ability to self-register online anytime
- Ability to pay your bills online
