## Patient Credit Check and Propensity to Pay Advisor

Propensity to Pay Advisor from DCS Global is a powerful tool that predicts the likelihood of a patient paying the self-pay portion of their medical expenses. This is not just another credit check. It is a complete analysis of the patient's ability and likelihood to pay their healthcare expenses. Propensity to Pay Advisor employs a credit model that includes data on the patient that other systems don't even consider. The result is advanced payment risk protection so that prior to their treatment, you can work with patients to establish methods of payment that will ensure you're compensated, including Medicaid and Charity Care.

Based on statistics, your staff can identify the likelihood of patients making their self-pay. Additionally, facility specific criteria, score ranges, rules and edits can be built that will provide an alert to the admissions staff, patient accounting or business offices for special handling of the account.

In a nutshell, Propensity to Pay Advisor helps you increase your collections and reduce bad debt and lost revenue. And it couldn't be easier to use Propensity to Pay Advisor, as it's fully integrated with your ADT system, automating the credit check processing and eliminating double entry. Claims and invoices are processed much faster and more accurately, improving your bottom line.

### Why Use Propensity to Pay Advisor ?

- *Instant verification of patient credit status*
- *Fully integrated with HIS*
- *Identifies patients qualified for Charity Care or Medicaid prior to the patient visit*
- *Identifies and manages self-pay accounts for early financial counseling*
- *Increases staff productivity by automating credit check process at time of registration*
- *Improves cash flow*

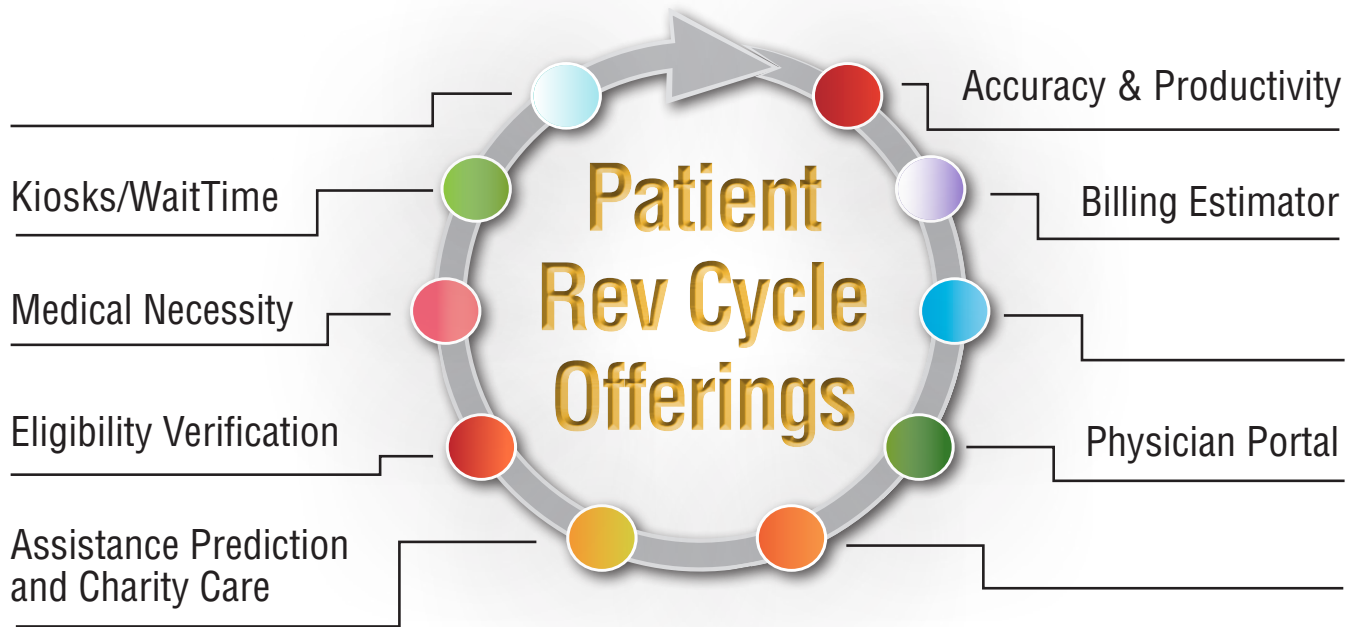

## The Patient Access Company
