

RegKiosk™

The Total Patient Self-Service Solution

RegKiosk™ empowers patients to take control of their own health and enhance patient services while controlling your costs. Using a carefully integrated system of kiosk software, hardware and content—with a user-friendly interface, 24/7 reliability and robust security, healthcare kiosks from DCS will make the patient check-in process virtually flawless. In addition, self-service kiosks help to minimize patients' wait time and improve their satisfaction. By accepting co-payments via credit card on the kiosk, there is substantial increase in the overall point-of-sale cash collections.

Providing a safe and secure unattended operation, RegKiosk™ offers advanced security features to prevent access to the operating system. Our automated check-in process helps drastically reduce patient overflow in high traffic areas.

Our automated check-in process saves your staff the hassle of having to manually check patients in. With RegKiosk™, patients can independently validate their information to ensure a positive identification.

Why Use RegKiosk™?

- Patient self-service check-in
- Advanced digital ID authentication
- Retains Consent/HIPAA forms
- Retains scanned images
- Validates patient demographics and insurance information
- Co-pay payment solutions
- Digital signature on consent forms
- Patient and family member surveys
- Hospital directories/maps
- Improves patient satisfaction
- Increases staff efficiency
- Intuitive touch screen interface with a focus on patient self-service functions
