

# ScanMe™

## Card Scanning PLUS Correct Plan ID

ScanMe™ from DCS Global revolutionizes how health plan information, eligibility information and correct plan IDs are entered for eligibility verification. During the registration process, the patient's health plan card is automatically scanned to provide registrars with the correct plan ID, and the verification process is initiated. That means no more tedious manual entries of health plans and group identification numbers. ScanMe™ helps ensure the patient's data is accurate and patient revenue is booked under the correct plan code and financial class.

Healthcare industry sources cite that 75% of all healthcare claim denials are due to patients' ineligibility for services billed to the insurer by the provider. Most of the providers book their claims with incorrect plan codes and then rework the cases at the back end to correct this problem. Using Eligibility Verifier™ & ScanMe™ from DCS Global can improve denial rates, reduce A/R days and increase revenue.

### Why Use ScanMe™?

- *Correct plan ID at time of scanning*
- *Instant scanning and verification of patient benefits and coverage*
- *Fully integrated with HIS*
- *Verifies coverage before services are provided*
- *Identify and manage self pay accounts for early financial counseling*
- *Increases staff productivity by eliminating manual entry of benefit plan information & choosing wrong plan code (and the chances for mistakes)*
- *Further increase staff productivity by eliminating eligibility verification via telephone*
- *Improves cash flow*
- *Enhances reporting capabilities*

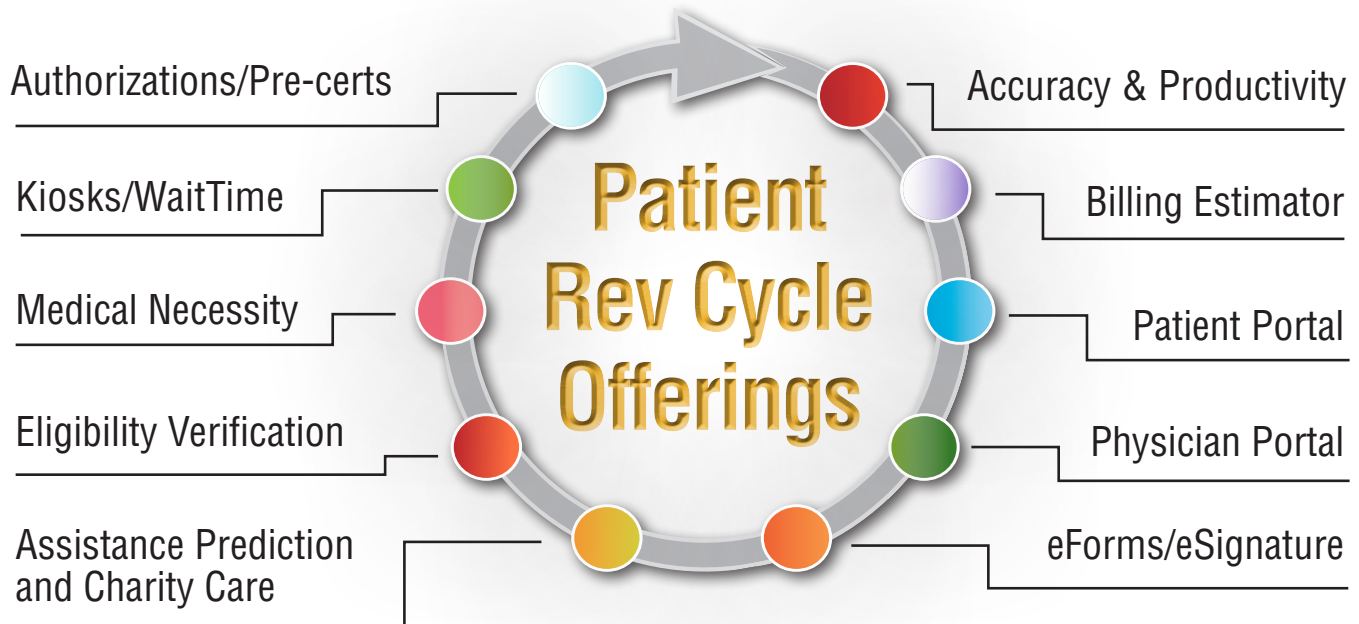

## The Patient Access Company

DCS Global is one of the leading providers of healthcare on demand software solutions and services for the PAS/PFS community. We offer innovative, cost-effective and efficient web solutions to healthcare companies around the world.
